Phone: (512) 894-0008 Fax: (512) 894-4290

Customer Terms and Conditions Regarding Warranty:

The assembly and manufacture of electro-mechanical devices is a complex operation with many variables. It would be impossible to list every condition or product our company is capable of or involved in producing. Every customer is different and every product/process varies. In an effort to define warranty we have outlined the following conditions.

UStx provides products and services based under these conditions and sells to our customers based upon this understanding of warranty. Receipt of a purchase order from a customer is acknowledgement they understand and agree with this definition.

UStx warrants any products manufactured to be free from manufacturing defects in material and workmanship at the time of shipment.

Customer is solely responsible for determining the appropriateness of any product(s) UStx manufactures to the customer's specifications.

Products are only warranted if they are employed for appropriate use and working environment as originally intended. Product abuse voids warranty.

If any product is shown to UStx's satisfaction to be found defective in material or workmanship at the time of shipment, UStx will at its option repair or replace the defective product or refund an appropriate portion of the net purchase price.

UStx shall have no obligation with respect to any defect in any of its products or services unless it is notified within thirty (30) days from the date of shipment of the product for cosmetic damage and for one (1) year for material or manufacturing defects.
